

Baltix Sustainable Furniture, located in Long Lake Minnesota, is a manufacturer of green, sustainable office furniture. Our standard product line includes a comprehensive collection of tables, desks, filing and storage devices as well as custom product designs to match specific end-user requirements. When we need to transport our finished products quickly and safely from our Minnesota plant to destinations across the U.S., we call on Dominic and HVC Expedite.

Dominic has proven that he can react to our special needs with speed, precision, and quality. From the moment that the truck is loaded and on the road, we have immediate access to the status of our shipment.

We find great comfort in knowing that Dominic “has the ball” and that we can move on to other opportunities.

HVC Expedite has established a new quality standard when compared to traditional freight carriers.
